

Lab 4

Class Discussion

- Download and run the provide IPYNB scripts on your computer, submit (a link in this class discussion where anyone of your classmates will be able to watch) the Panopto Video Recording of a successful run on your computer.
- Based on the 4 experiments you executed using 3 different models using Ollama and Replicate, provide your answers for the following:
 - Did you encounter any issue part of the setup process?
 - What was the computer hardware (processor (CPU and GPU) and main memory) that you have on your computer?
 - How long did it take you to complete the installation?
 - How long did it take to complete the execution of the provided/modified IPYNB script for every model?
 - Comment on the quality of the output produced for every model.
 - Comment on the speed for every model.
 - Which model provided the complete, correct, and coherent responses? Explain your answer.
